AUTOMATIC PAY STATION (LPR)

CAN BE CONFIGURED TO SUPPORT
DIFFERENT TICKETING SOLUTIONS:

TICKETING SOLUTION

Enables controlled Free Parking for periods of time: 1 - 2 hours to genuine customers. Any re-entries by same vehicle registration within the free period of parking are flagged and a charge can be applied after the accumulated free period is used. Thereby stopping the abuse of all day parking without consequences.

TICKETLESS SOLUTION

Vehicle registration numbers are captured on entry via LPR cameras which are transmitted to the CDS server.

Motorist can now pay either at the preferred Pay Station kiosk prior to leaving, using coin, credit card, notes, pay wave or mobile phone via the CDS touch screen (see reverse of flyer) or alternatively when leaving the carpark at the exit gate.

Permanent registered users now have the convenience of drive-in/drive-out without having to stop at the exit station on leaving with automatic activation of boom gate.

Casual users can either pay at the APS or at the exit station. If payment is made at the APS the boom gate activates automatically for the casual user on exit.

CONFIGURATIONS

TICKETING SOLUTIONS:

- Low cost thermal barcode disposable paper tickets
- Durable Fan Folded tickets,
- Ticketless systems using licence plate recognition and touch screen interface.

PAYMENT SOLUTIONS:

- Accepts multiple payment methods: coin, notes, credit card, pay-by-phone and special parking fee discount vouchers. Dispenses change if needed.
- Secure, robust, vandal resistant metal cabinet
- Fast unmanned payment for casual car park users.
- Issues a receipt for exiting the car park.
- Improves payment collection methods to facilitate efficient car park operation.
- Recharges "stored value" car park access cards

PARKi App

TOUCH SCREEN

The touch screen provides the instructions to guide the customer through the payment process.

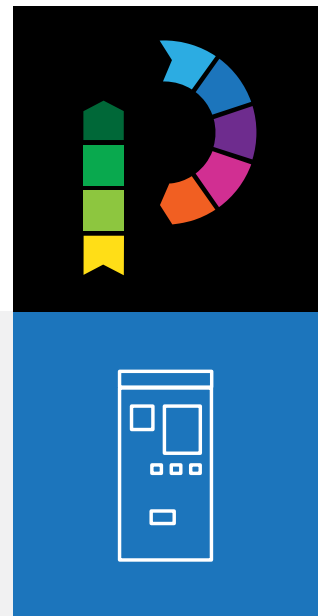

When used with the PARKi Ticketless LPR Solution the screen allows the customer to easily select the LPR image of their car on entry to confirm the amount of time they have used the carpark.

They are then guided through the payment process.

Upon exit the LPR recognises the customers licence plate and the boomgate opens automatically.

This benefits the customer and the carpark management allowing fast egress at all exit points.

AUTOMATIC PAY STATION (LPR) ACCESSIBILITY

CDS Pay station fully complies with Australian Standard AS1428.2 to enable this Pay Station to be used by all persons including physically challenged (disabled) persons, in wheel chairs.

Pay Station Dimensions are:
